ADVERTISING RATES.

Display advertisements are charged for at the rate of \$1.00 per inch per month. One change per month without extra charge. Single insertions, 50 cents per inch. Reading notices, set in 10-point type, 15 cents per line first insertion; 10 cents per line each succeeding insertion. Local set in 12-point black face type, 25 cents per line first insertion; 15 cents per line each succeeding insertion. One price to all and no deviation.

Entered at the Postoffice at Pioche, Nevada, as second-class matter.

Official Paper of Lincoln County

STATE BUREAU OF MINES.

There is now before the legislature at Carson a bill, introduced by Mr. McCafferty, providing for the creation of a bureau of mines and the appointment of a state inspector of mines, who is to be the chief officer of the bureau. The term of office is fixed to cover a period of four years, and the official is to have the assistance of three deputies. The salary of the inspector is to be \$3,600 per annum, while each of his deputies are to receive \$3,000 per annum.

The state is to be divided into three mining districts, and it will be the duty of the inspector, or his deputies, to enter, inspect and examine any mine, mill or smelter in their district, and the workings and machinery belonging thereto. It shall be their duty to make inquiry into the condition of such mine, mill, smelter, etc., and into all matters providing for the health and safety of persons employed. Geological records are to be kept in the office of the inspector at Carson City. Owners, lessees, or any mine official of authority is subjected to a fine of not less than \$100, nor more than \$300, for willful misrepresentation, or withholding of facts or information from the inspector or any of his deputies. On the other hand, the inspector or deputy inspectors are forbidden to reveal any information in regard to metallurgical processes, ore bodies, lodes or deposits of ore or location, course or character of underground workings, or give any information or opinion respecting any mine or metallurgical process, obtained by them in making such inspection, except in the way of official reports filed for record. Disobedience subjects the officer giving out any such information to a fine of not less than \$1,000 or more than \$5,000, in addition to removal from office.

Applicants for the office of mine inspector must first be examined as to their qualifications before a board consisting of five members, and composed of three experienced metallurgical miners and two mining engineers. The state inspector is to be elected at a general election held every four years, but the governor has the right to remove such officer for incompetency or any other cause. One good feature of the bill is that section which prohibits the employment in mines, mills or smelters of boys under 16 years, while the employment of women and girls is prohibited.

A NEW DIVORCE LAW.

There is a bill in the legislature providing for an amendment to the divorce law. It only requires a residence of six months now to obtain a severance of matrimonial ties. If the amendment is passed, a residence in the state of two years will be compelled. Upon this subject the Carson Appeal remarks:

"Many careful students of the ethics of the question hold that married people who have ceased to care for each other have no moral right to live together, and should cease the marital relation out of regard for themselves and posterity. Careful students of this question, which is a particularly deep and delicate one, insist that the offspring of parents where affection has ceased to exist, are weaklings physically and morally, and that they have a tendency to become criminals or degenerates."

"Psychological students the world over agree in the main on

this proposition, wherein they differ from the extreme moralists who insist that the foundations of society are undermined by easy methods of divorce, and some people advocate that no divorce at all be allowed.

"It seems that if two persons, or one of two persons is entitled from any good cause to a legal divorce, they are just as much entitled to it six months, or one month as two years."

LETTER FROM BERGMAN.

The RECORD is in receipt of a letter from Assemblyman George Bergman in which he wishes us to state that he is willing and ready all times to listen to any measure that the people of Lincoln county, as it now stands, may have for introduction in the legislature that will be to the benefit of the county. He does not wish it understood that he is working in the interest of the proposed new county of Clark alone; notwithstanding that he was the author of the Clark county bill.

The county division bill has been signed by Governor Dickerson, and Clark county will come into existence July 1, next.

THE FIRST TRAGEDY

TO BE ENACTED UNDER DOME OF NATIONAL CAPITOL.

Insane Man Unsuccessfully Bought the Life of President Andrew Jackson on the Afternoon of January 30, 1835.

On September 13, 1879, the cornerstone of the Capitol building was laid by George Washington, in accordance with Masonic ceremonies. One hundred and fifteen years have elapsed since that date, and there have been four tragedies of note beneath the massive dome of that great marble house of national legislation, writes Smith D. Fry in the Pittsburgh Dispatch.

Peace and quiet reigned in Washington, there was no political excitement, and there was neither provocation nor excuse for the deed, and yet, on the afternoon of January 30, 1835, an attempt was made upon the life of President Andrew Jackson. That was the first effort that was ever made to shock the American people with the taking of the life of a president of the United States; fortunately it was unsuccessful, and providentially so, for the assassin was well prepared for his direful deed. It was the work of an insane man.

On that afternoon the funeral services of a deceased representative from South Carolina were attended in the hall of the old house of representatives, the part of the capitol now known as Statuary hall. The funeral was attended by the president, the members of his cabinet, the United States senate and the members of the house of representatives.

After the conclusion of the sermon and the benediction President Jackson left the hall of the house at the head of the procession, which was to escort the remains of the deceased to the Congressional cemetery. President Jackson had closed the rotunda and was just about to step upon the eastern portico when a man rushed from the crowd, leveled a pistol at the president when but five feet distant and pulled the trigger.

The cap exploded with a loud report but the pistol was not discharged. Dropping his pistol, the would-be assassin drew another, but Lieut. Gedney of the navy knocked the murderer down, just as the president, without fear of danger, rushed at the man and struck at him with a heavy cane.

Harriet Mirabeau, who attended the funeral services, and saw all of the excitement men of that day. Near the coffin and the gray-haired old president, feeble, and looking scarcely able to go through the ceremony, saw him rise, somewhat feebly, to follow the coffin. When I reached the rotunda, the people were excited with the news of the deed; and I saw the assassin rush into the rotunda, pursued and surrounded by the crowd. I saw his hands and bare arms struggling above the heads of the crowd, in resistance to being handcuffed. He

was overpowered, conveyed to a carriage and taken before a magistrate. "The attack threw the old soldier into a tremendous passion. He fears nothing, but his temper was not equal to his courage. It was found necessary to put him into a carriage and take him home. We feared what the consequences would be. We had little doubt that the assassin, Lawrence, was mad; and as little, that before the day was out, we should hear the crime imputed to more than one political party or individual. And so it was. Before two hours were over the name of almost every eminent politician was mixed up with that of the poor maniac who caused the uproar. The president's conduct on the occasion was the most virulent and protracted."

That was the first effort ever made to kill a president, and it was the only attempt that has ever been made at the capitol.

Notice of Application for U. S. Patent.

Serial No. 6221.

Survey No. 342.

U. S. Land Office, Carson City, Nevada, January 25, 1906.

Notice is hereby given that in pursuance of the Act of Congress approved May 10, 1872, H. E. Freudenthal, whose postoffice address is Pioche, Lincoln county, Nevada, has made application for a patent for the Crescent Consolidated Mining claim, consisting of the Crescent, Crescent Extension, North Star and North Star Extension mining claims, all situated in Jack Rabbit Mining District in the County of Lincoln, State of Nevada, said respective lode mining claims being severally described as follows, to-wit:

Fifteen hundred (1500) linear feet on the Crescent lode, bearing gold, silver, copper and lead, the same being 150 feet northwesterly and 150 feet southeasterly from the point of discovery thereof, with surface ground 300 feet in width, and described by the official plat and by the field notes on file in the office of the register of Carson City and District Nevada, as follows, to-wit:

Beginning at cor. No. 1.

U. S. M. No. 1 bears N. 7 deg. 45 min. E. 361.9 feet.

U. S. M. No. 2 bears S. 10 deg. 00 min. W. 425.6 feet.

A pine tree 18 in. diam. blazed and scrubbed B. T. 3-3433, bears S. 10 deg. 21 min. E. 20 ft.

U. S. M. No. 3 bears S. 7 deg. 23 min. W. 600 ft. to cor. No. 2, on line 4-1 North Star lode, this survey.

Notice For Bids.

Notice is hereby given that the trustees of Pioche School District No. 1, will receive bids at their office in Pioche, Nevada, up to and until noon of the first day of March, 1906, for the erection of a two story room for school building with boiler house and heating plant, in accordance with plans and specifications adopted by said Trustees.

Said plans and specifications may be seen at the office of the Board of School Trustees, and at the office of Liljenberg and Manner, architects, at Salt Lake City, Utah.

All bids must be addressed to the School Trustees of Pioche, Nevada, and left with said Trustees before the date of the opening of bids. Bids must be enclosed in a sealed envelope, properly addressed as above stated, and marked in one corner "Proposed for the construction of Pioche Public School Building." No bids will be considered unless the certified check for five per cent of the bid amount is deposited with the bids.

Each proposal must be accompanied by a certified check for five per cent of the bid amount, to be deposited with the bids.

The school building to be erected is to be a two story building, with boiler house and heating plant, in accordance with plans and specifications adopted by said Trustees.
